**Embodiment**

**December 23, 2017 to April 1, 2018**

Ivey Galleries

In *Embodiment*, numerous works by Canadian women artists come together to examine the creation of social meaning on a variety of levels, from the personal to the global. Artworks by Joanne Tod, Suzy Lake, Shelley Niro, Jamelie Hassan, Jessica Karuhanga, Heather Goodchild, Betty Goodwin, Rae Davis, Thelma Rosner, and many others reflect diverse realities and experiences.

Photographs, video installation, drawings, and paintings extend in new ways, and often challenge, traditional symbolic representations of the female form, which have a long and complex history in Western art. As with all artworks, the selections contain multiple references and associations that speak to perception and reception, in this context focusing on women (and women artists) as being both in situation and indeed as situation: who we are, and how we see the world and navigate life.

Works in the exhibition address more abstract concepts of identity, and in particular, assumptions about the attributes, behaviours, and roles of women. They explore definitions of beauty and femininity, and concepts such as gendered spaces. The artist as sitter or performer can be seen as expressing both personal experience and commenting upon broader social values. Other selections provide perspectives on belonging within a community celebrated through shared background and traditions, which have often been neglected within larger cultural conversations.

Certain works widen their scope to consider the functioning of humanity as a whole, and extending further, the spiritual beliefs underpinning lived experience. While some selections offer insights via more conceptual art approaches, importantly, aspects of the body, whether through form, gesture, and voice remain important elements. Taken together, the works in *Embodiment* suggest ways in which identity involves existence as ornament and instrument, and the actions of engagement and experiment.

Interior Gallery

In 1918, the Canadian government extended the federal franchise to most Canadian women. To mark the 100th anniversary of this event, Museum London presents *Women’s Lives in Canada: A History, 1875-2000*.

This exhibition will consider what it meant to be female in Canada from the end of the nineteenth century through to the end of the twentieth century. A thematic exploration, it will look at girls’ and women’s roles in the family, their opportunities for education, and the paid and unpaid work they performed.

Playing off the idea of thinking globally and acting locally, the exhibition will highlight the experiences of a mother/daughter duo from London to illuminate continuity and change in Canadian women’s lives over time. The women in question? Euphemia “Effie” Van Camp Wyatt (1875–1958) and her daughter, Mary Louise Wyatt (1907–2000). Can these two white women who enjoyed relative financial security reflect the lives of all Canadian women? Certainly not. But highlighting the ways in which their choices were typical or atypical of those made by women in Canada more broadly will help to answer some important questions: What opportunities did girls and women have? What choices could they make as they moved through the different stages of their lives?

Using a combination of photographs, archival materials, costume, and larger artifacts from Museum London’s extensive material culture collection, this exhibition will invite you to consider what it meant to be female in Canada in the past. It will also make you think about what it means to be female in this country today.

Guilty Pleasures and Bad Habits: Alcohol, Caffeine, Tobacco, and...

January 27 to April 29, 2018
Volunteer and Moore Galleries

Most of us admit to guilty pleasures, those things we feel we shouldn’t crave but do. Some of us even admit to bad habits. Many of those guilty pleasures and bad habits revolve around the consumption of alcohol, caffeine, and tobacco.

London serves as an interesting microcosm of the story of these substances. In terms of alcohol, many Londoners did and still do drink it. As well, many have been involved in its manufacture and sale. Still others have opposed both the drinking and manufacturing of alcohol as they participated in temperance and prohibition campaigns. For their part, tea, coffee, and chocolate have been and continue to be much loved sources of caffeine for Londoners today. We have participated in the rituals surrounding their consumption. Local businesses thrived through the provision of these goods as well as through the sale of the equipment necessary for their preparation and presentation. As with alcoholic and caffeinated products, tobacco processing provided a source of employment for many Londoners. Over time, they have also partaken of tobacco products in the form of snuff, cigars, pipes, and cigarettes. This, too, has been steeped in ritual and tied to conceptions of gender and class. The meanings around tobacco consumption changed as health concerns solidified into hard and fast data linking smoking to health issues.

Featuring more than 150 artifacts from Museum London’s material culture collection, this exhibition will invite you to explore the history of some of our guilty pleasures and bad habits. It will also ask you to share your own.

Community Gallery

Do you judge a book by its cover? Does a book’s cover help you decide whether you might like to read it or not? If you answered “no,” then the cover isn’t doing its job. Book covers and dust jackets evolved to advertise books, to offer insight into their contents, and to lure consumers to buy them.

Before the early nineteenth century, however, book covers had a far more basic role. While they were often made of luxurious materials such as leather, gold and silver, their main function was to protect the hand-bound pages inside.

The industrial revolution changed this. Steam-powered presses manufactured books out of mechanically-produced paper and with cloth or paper covers. Because these covers soiled easily, publishers began to wrap books in dust jackets to protect them. Both book covers and dust jackets had the added benefit of being printable using multi-coloured lithography and other illustration processes. Artists and graphic designers soon got to work in what became a whole new industry.

In this exhibition, you will see cover art and dust jackets from books held in Museum London’s extensive material culture collection. Featuring children’s storybooks and cook books, school textbooks and religious works, this exhibition will give you an opportunity to look at a wide range of book covers from the late nineteenth to the mid-twentieth centuries.
